THE PROUD TRADITION:

Schenectady looks to the next 100 years.

Companies don't make progress. People do.

The people at Schenectady General Electric—key contributors to their company's 100 years of progress—have built more than half of America's total capacity to generate electric power. Fulfilling the vision of an electrically powered society by their Schenectady GE forefathers—Thomas A. Edison and Charles P. Steinmetz—has taken a rare combination of creativity, skill and dedication.

Today, Schenectady GE people continue to apply their talents to the electrical needs of tomorrow. We furnish not only the capacity to generate power, but also many of the electrical equipments and services that keep America growing and prosperous. And in our seven labs and research centers, we seek new ways to use electric power even more efficiently and effectively.

At Schenectady General Electric, many thousands of people are dedicated to making the next 100 years even more productive for an electrically powered America.
